1 Project Progress

1.1 Week 1

Got familiar with angular JS and its features. Also got acquainted with stuff like

- Components and Modules

- Services and Injectables

- Directives and Pipes

- Events, Input and Output Properties

- Property, class, style, event binding

- ngfor,ngIf,ngswitch

1.2 Week 2

- Connecting to server

- Using Routers

Made a simple single page app. Started making the main website. Made navigation bar and in process of making individual pages. Met with the backend team and the mentors to discuss what we should expect from the project. Learnt how to build single page websites and how to connect to the server, Reactive extentions form validations etc..
